averege of previous grade
by age_group

Average Previous Grade by Age Group

Insights & Recommendations

Student Academic Performance and Lifestyle

Key Insights

1. Most grade: display the grade confirmed by students ids
2. Focus score: identify the age group with the highest average focus score.
3. Attendance: identify the group with the highest or lowest average attendance.
4. Lifestyle: describe any relationship with grades only after checking the relevant charts.

Recommendations

- Investigate potential attendance barriers where attendance is lower.
- Explore study and sleep habits alongside academic outcomes.
- Consider student support initiatives where stress levels warrant attention.

Limitations

The analysis identifies patterns in the available dataset. It does not prove that lifestyle factors cause academic outcomes.
